"It is also more convenient and less expensive to the Department to deal with one party rather than with many."

It is the understanding of the Treasury Department officials that the Stewart syndicate will not take advantage of the delay offered by the Secretary of the Treasury to pay for the bonds, but that on the other hand payments therefor will be made promptly.

Already Assistant Secretary Curtis has been in communication by long distance telephone with parties representing the syndicate who desire to know when they can deposit golf for the bonds.

He replied that they could do so at the Sub-Treasury at New York up to the close of business to-day.

The total sum that the Government will receive for the issue will aggregate about \$58,000,000.

From the statements contained in the bid made by the syndicate. Treasury officials believe that between \$90,000,000 and \$40,000,000 of the gold will be paid in at the Sub-Treasury at New York and the remainder at the Sub-Treasuries at Boston, Philadelphia, Chicago and San Francisco.

The announcement that Secretary Carlisle had awarded the syndicate formed by President Stewart, of the United States Trust Company, the entire \$0,000,000 Government bond issue at \$117.077 had no perceptible influence upon the Wall stree, market this afternoon.

J. Pierpont Morgan authorizes the following statement: The syndicate which has secured the issue of Government bonds will place them on sale. Persons wishing to obtain them can sprocure a limited amount—the first \$5,000,000 anyway—at 119. Applications for the bonds may be made to Harvey Fisk & Sons, or to Drexel, Morgan & Co.

It is stated that Mr. Rockefeller bid for \$10,000,000 bonds through the syndicate, and will be allotted only \$5,000,000.

ST. LOUIS, Nov. 26.—Representative R. P. Bland has written The Post-Dispatch about the bond issue, as follows:
If the Secretary of the Treasury would exercise his option to pay out silver for greenbacks and Treasury notes issued under the Sherman law, there could be no drain of gold from the Treasury. The Government of France does, and keeps at her money at par. This bond issue bustness looks like an attempt to force Congress to retire our Treasury notes and to substitute a system of National bank currency. The fight is still on between the advocates of the free colnege of all-ver as the true mode of currency reform and the adherents of the National banks. It is proposed by the latter to farm out to corporations the power to control the value and volume of money. Surely, the money modipoly of this country now thinks it is in the saddle, but time will tell whether the people or moneyou are to rule this

To-day's developments in the \$354,000 defalcation from the National Shoe and Leather Bank may go a great ways towards clearing up the mystery as to what has become of the large sum stolen by Assistant Bookkeeper Samuel C.
